

MEDICAL LABORATORIES

About us:

Medical Laboratories is a subsidiary organisation of Med Logistics Health Services Limited, a Healthcare enterprise which was incorporated in November 2016. The organisation aims to revolutionise the Healthcare industry by providing a unique end-to-end solution for the public's health care needs, from consultations with prominent physicians to sample collection and clinical result interpretation. Our state-of-the-art Healthcare facility is conveniently located in the heart of Central London and boasts multi-disciplinary laboratories as well as clinical treatment and sample collection rooms.

Our vision:

Our vision is to promote optimal health, independence, and quality of life free from personal constraints and void of discriminatory blockades. In other words, equality in Healthcare.

Our objectives:

- To provide our service users with the best possible care, by understanding and exceeding their expectations,
- To respond to the needs of our clients and provide them with a dependable service in their chosen environment,
- To support and encourage staff development to enable them to achieve client expectations,
- To always maintain the highest professional and ethical standards,
- To encourage innovation, ambition, and continuous improvements to our service.

Quality Assurance:

We follow an effective Quality Management System (QMS) based on the International Organisation of Standardisation (ISO) 9001/15189 standards. The QMS also incorporates key elements of the Health and Social Care Act regulations and various Health and Safety legal protocols. Our QMS focuses on continuous quality improvement strategies such as audits, nonconformity management, control of risks, proper documentation fundamentals, trend monitoring and organisational responsibilities. This dedication to quality has earned the organisation certifications with Care Quality Commission (CQC), and accreditations from the United Kingdom Accreditation Service (UKAS).

Complaints policy:

Customer satisfaction is regarded with the utmost importance within our organisation. We are committed to service excellence and understand this is achieved through customer engagement. We will always aim to rectify our shortcomings and prevent recurrence. Therefore, in the unlikely event that a customer is unhappy with the service they have received, we encourage the customer to raise a complaint by providing details of the complaint to info@medicallaboratories.co.uk.
